DETAILED ACTION

Election/Restrictions

This Office Action is in response to Amendments filed on June 27, 2005. The rejection of this application has been withdrawn due to a restriction requirement (the examiner should have raised the issue of restriction and the examiner takes this opportunity to correct her position by raising the issue of restriction). Claims 1, 3-12, 14-43, 45-47, 49-51, 53-55, 57 are presented for examination.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
 - I. Claims 1, 3-12, 14-40, 57, drawn to an information distributing method of distributing information via a communication path to an information user unit from first information providing resource unit and a second information providing resource unit, classified in class 709, subclass 225.
 - II. Claims 41-43, 45-47, 49-51, drawn to an information distribution system connecting a primary information providing unit for providing a primary information, a quoted information providing unit providing quoted information quoted by said primary information and an information display unit displaying provided information, classified in class 709, subclass 203.
 - III. Claims 53-55, drawn to a quoted information providing apparatus providing quoted information quoted from a primary information displayed by an information display unit to said information display unit, classified in class 709, subclass 217.

Art Unit: 2157

2. The inventions are distinct, each from one another because of the following reasons: Inventions II, III, and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in an information distribution system having a quoted information providing unit providing quoted information quoted by the primary information unit (as set forth in inventions II and III). See MPEP § 806.05(d).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N Burgess whose telephone number is (703) 305-3366. The examiner can normally be reached on M-F (8:00am-4:00pm).
